PROFILE

Backend engineer working in Java and Go. Now migrating a ride-hailing platform from a Node.js monolith to Java 21 microservices at Itti, after leading the backend team through a SAP-to-cloud migration at Apex.

EXPERIENCE

Software Engineer

Itti · MUV · Jan 2026 — Present · Córdoba, Argentina (remote)

- Migrating the platform from a legacy Node.js monolith to Java 21 microservices, keeping the legacy codebase running while the new services take over.
- Build event-driven services that exchange trip state with the rider and driver apps over Kafka and WebSocket.
- Own quality and production health — Sonar gates, New Relic, Squadcast on-call.

Java 21 · Kafka · Redis · WebSocket · Node.js · Docker · Nullplatform · New Relic · Sonar · Firebase

Team Lead — Backend

Apex Global Mobility · Sep 2024 — Dec 2025 · Córdoba, Argentina (remote)

Senior Backend Developer · Oct 2022 — Sep 2024

- Led the migration of SAP business processes into a new event-driven digital architecture.
- Built reactive Java 21 services and Go microservices consumed across the platform.
- Negotiated scope with the product owner and coordinated delivery with front-end, QA and data.
- Owned technical decisions and code review, and ran 1:1s and feedback across the squad.

Java 21 · Spring Boot · WebFlux · Go 1.18 · Python · Kafka · Kubernetes · Azure · MongoDB · Redis

Backend Developer — Java

Chattigo SpA · Dec 2021 — Aug 2022 · Córdoba, Argentina (remote)

- Built and supported conversational bots across WhatsApp, Telegram, Facebook and Instagram.
- Developed reactive services in Java 8-11 and Go 1.16, running on Kubernetes.

Java 8-11 · WebFlux · MyBatis · Go 1.16 · SQL Server · MongoDB · Redis · Kubernetes
